

Dr Srđan Krčo is a co-founder and CEO of DunavNET, a company designing turnkey IOT solutions. He has over 20 years of experience, working with large multinational companies and driving international collaborative research and innovation projects addressing IoT technology development and application domains like smart cities, agriculture and manufacturing. Currently, he is coordinating the research and innovation H2020 project TagItSmart, creating enablers for IoT of mass-market goods. Srdjan is a Board member of the International IoT Forum and is actively participating in IoT-EPI (IoT European Platforms Initiative) and AIOTI (Alliance for IoT Innovation) activities. In 2007, Srdjan won the Innovation Engineer of the Year award in Ireland. He has published over 15 patents and more than 70 papers at international conferences and journals and is a frequent speaker at international events addressing IoT and its applications. Srdjan is a Senior IEEE member. He received Microsoft's MVP award for 2017/18 for the work done in the IoT domain.
