VoLTE and Video over LTE: Challenges and opportunities from regulatory perspective

In this presentation , we will focus on the regulatory challenges for the deployment of VoLTE and ViLTE. Successful implementation of VoLTE depends, from a regulatory point of view, on ensuring:

- no discrimination between users: geographical discrimination, price discrimination,

- end-user satisfaction in term of QoS/QoE

The lack of interoperability will conduct us to the old days issue: "on-net club" . This means that interoperability is a must, so how should we address it and solve it ?
