LEVERAGING ON INTERNATIONAL AND REGIONAL COOPERATION FOR SUSTAINABLE E-WASTE MANAGEMENT IN THE AFRICAN REGION

Helen C Nakiguli
Senior Officer Environment Management, Uganda Communications Commission
Chair – ITU-T SG5 RGA

UGANDA
COMMUNICATIONS
COMMISSION

communication for all

HAVE WE ALIGNED OUR REGIONAL E-WASTE MANAGEMENT VALUE CHAIN?

Salient Vs. Silent issues of e-waste management

Lack of awareness and sensitization

- Lack of environmental and technical competence
- Capacity gaps

Stakeholder collaboration

(key stakeholders such as - government, service providers, institutions, investors, recyclers, academia, etc)

- Are we giving the same attention to the informal market/sector (cognizant that- in developing countries the reality of WEEE is from here)?

Considering the entire e-waste stream

- Recent focus- small, portable , mobile gadgets due to their high replacement rate (ICT equipment away from EEE)

What would be the reality?

What do we need?

Prioritizing and commitment

Where are we?
