

# Abstract

- Recall that in Egypt, it was resolved that African delegates participate actively in ongoing work relating to IMT-2020, and Nigeria was delegated to champion this course for Africa. Relatively, ongoing work in Q5/13 of ITU-T SG13 involves production of handbook as a guide to facilitating developing countries in particular, and the rest of the world that are interested in having good background to effectively contribute to developments of IMT-2020.
- In light of above, my presentation will reveal what should constitute chapters to the handbook, methods of getting information to build up the chapters, and discuss synergies and use cases already in place as was identified in various groups that had contributed to discussions on IMT-2020. Such Groups, meetings workshops among others include works of FG-IMT-2020, ITU SG MEETINGS, fFG-SDN, FG-ML5G, Workshops during these meetings, etc
