

“Overview on Big data Adoption in Developing Countries”

This presentation will give an overview on the supplement on “*Big Data Adoption in Developing Countries*”, which is currently under development at Q5/13, and present its main sections, which were elaborated based on the results of a survey on the same topic (TSB Circular 120). This presentation will aim to encourage the workshop’s participants, from African countries, to contribute in the development of the supplement by submitting contributions to Q5/13 on the status of Big Data adoption in their countries as well as on their experiences with the use of Big Data in some sectors such as healthcare, agriculture, education, etc.
