

Can you help lay the foundations for modern, smart and sustainable cities?

UNITED FOR SMART SUSTAINABLE CITIES (U4SSC)
IS SEEKING YOUR EXPERT INPUT FOR ITS THEMATIC GROUP:
"SMART CITY PLATFORM"

Are you an urban practitioner, city planner, engineer, designer, scientist, sociologist, geographer, government official, researcher or any other relevant actors who are **passionate about the topic of Smart Sustainable Cities** and would like to contribute to the work of this **international thematic group**?

Be part of the **U4SSC Initiative** - a **multi UN agency global initiative** to advocate for public policy and to encourage the use of digital technologies to facilitate and ease the transition to smart sustainable cities. Join this thematic group which is responsible for the development of the deliverable "**Smart city platform**".

This thematic group will **examine the key features of a city management platform**. The smart city platform is a key enabler for a smart and sustainable city. It will identify the characteristics and minimal technological architecture needed to implement smart city platforms that are open, interoperable, and cross-sector and cross-border compatible.

The thematic group also provides the ideal opportunity to **meet and share knowledge and insights around implementing platforms for smart sustainable cities with other experts** from across governments, public/private sector, academia, research and beyond.

KEY INFO

The meetings, virtual meetings and work of the thematic group will be conducted through the U4SSC's SharePoint collaboration webpage, and experts will need to contribute to drafting chapters corresponding to their areas of expertise. The report will be compiled and published through the U4SSC.

The project leader for this deliverable is Ramón Ferri (City of Valencia, Spain).

HOW TO GET INVOLVED

Applicants will need to confirm the following:

- **Communication:** The applicant can easily express themselves in English (the working language of all meetings, documents and means of communication), in oral and writing.
- **Knowledge Sharing:** Applicants must be willing to share information and expertise and contribute actively to the deliverables.
- **Availability:** Applicants must be willing to avail themselves for online meetings of the thematic groups.
- **Transparency:** Applicants must agree to publish their names along with their professional capacity (e.g. consultant, scientist, researcher), country of residence and email address on the U4SSC platform and deliverables. Applicants must register at the U4SSC website to facilitate the tasks of the thematic group.
