

Bridging the Standardization Gap (BSG)

ITU-T Leadership Meeting @ WTSA ----->

Dr. Lara Srivastava
Head, Bridging the Standardization Gap

4 November 2017

ITU Constitution

Functions and Structure of the Telecommunication Standardization Sector

Article 17 of the ITU Constitution refers explicitly to the “concerns of developing countries”

Telecommunication Standardization Sector

Art. 17 Constitution

ARTICLE 17

Functions and Structure

104
PP-98

1 1) The functions of the Telecommunication Standardization Sector shall be, bearing in mind the particular concerns of the developing countries, to fulfil the purposes of the Union relating to telecommunication standardization, as stated in Article 1 of this Constitution, by studying technical, operating and tariff questions and adopting recommendations on them with a view to standardizing telecommunications on a worldwide basis.

ITU Strategic Plan

PP Resolution 71 and the Strategic objectives of the ITU-T

BSG is a key strategic objective for ITU-T

In the ITU Strategic Plan 2016-2019 (Annex to Res. 71), the following is listed as one of the 5 overarching objectives of ITU-T :

Promote the active participation of the membership, in particular developing countries, in the definition and adoption of non-discriminatory international standards (ITU-T Recommendations) with a view to bridging the standardization gap

Strategic
Plan
(PP Res. 71)
T2

Plenipotentiary Resolution 123 on BSG

Since 2002 there is a PP-resolution on Bridging the Standardization Gap

PP-14 Resolution 123 (rev. Busan) resolves, *inter alia*, to instruct the Secretary General and the Directors of the 3 Bureaux to:

- Provide developing countries with **assistance to enhance capacity building** in the standardization field
- Identify ways and means to **support the participation of representatives of developing countries** in the meetings of the three Sectors of ITU and the **dissemination of information** on standardization
- Further **collaborate with the relevant regional organizations** and support their work in this area...
- ...

PP
Res. 123

WTSA Resolution 44 (Rev. Hammamet, 2016)

WTSA and Bridging the Standardization Gap

Since 2004, we have a WTSA Resolution on BSG:

... that developing countries are still encountering multifarious difficulties in ensuring their efficient participation in the work of ITU-T, in particular engaging in and following up the work of the ITU-T study groups

Res. 44 includes (in its annex)
an **Action Plan** to implement Resolution 123 of PP-14

*NB: In the ITU-D, there is a Recommendation ITU-D 22 on
“Bridging the standardization gap in association with regional groups of the study groups”*

What Resolution 44 contains

“Resolves”, “Instructs” and an Action Plan

- Res. 44 contains a number of resolutions (“**resolves**”) and instructions (“**instructs**”) that are applicable to ITU-T Study Groups, TSAG and the TSB Director (*in some cases in collaboration with other sectors*)
- The Annex of Res. 44 includes an **Action plan** for the implementation of PP Res 123, containing 4 programmes

ANNEX
(to Resolution 44)

**Action plan for the implementation of Resolution 123 (Rev. Guadalajara, 2010)
of the Plenipotentiary Conference**

I Programme 1: Strengthening standard-making capabilities

1) Objective

- To improve the standard-making capabilities of developing countries.

2) Activities

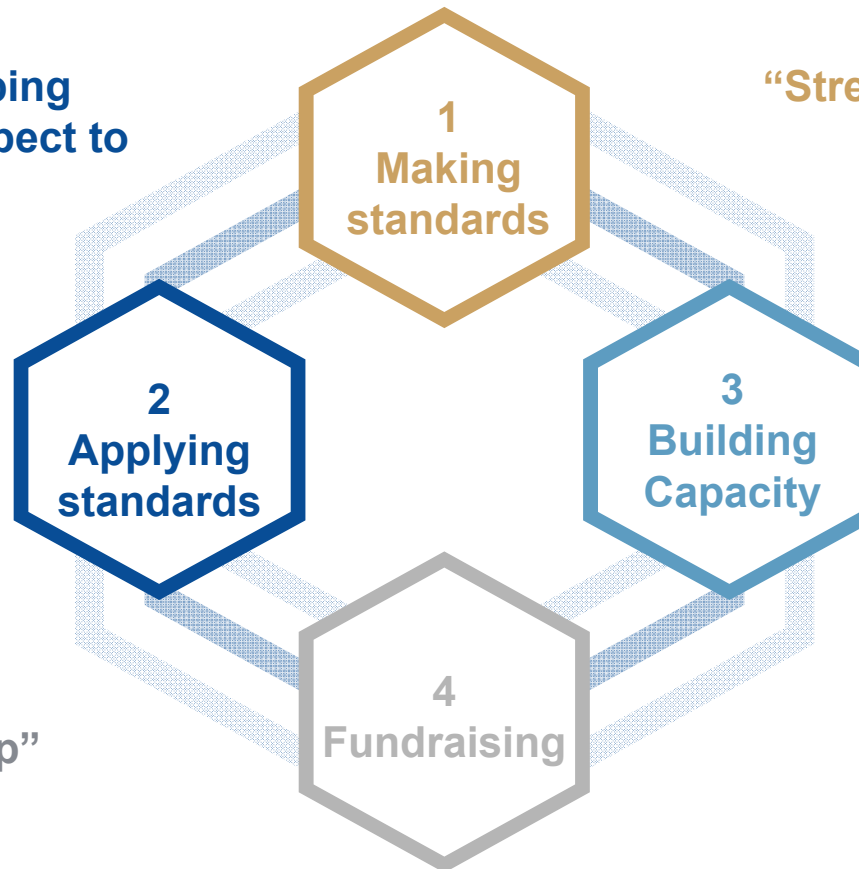

- Developing guidelines to assist developing countries in their involvement in ITU-T activities, covering, but not limited to, ITU-T working methods, formulating draft Questions and making proposals.

BSG Action Plan from Resolution 44

The 4 Programmes outlined the BSG Action Plan

“Assisting Developing Countries with respect to the application of standards”

“Strengthening standard-making capabilities”

“Fundraising for bridging the standardization gap”

“Human resources capacity building”

Implementing the Action Plan

The role of the BSG Implementation Group

Through Resolution 44,

- WTSA-16 **instructs** the TSB Director, in collaboration with the Directors of BDT and BR:
 - *to continue **implementing the objectives of the action plan annexed to this resolution**;*
 - *to continue the activities of the **implementation group established within TSB** to organize, mobilize resources, coordinate efforts and monitor work related to this resolution and the associated action plan*

- WTSA-16 **resolves** :
 - *that the action plan annexed to this resolution, having the objective of bridging the standardization gap between developed and developing countries, should be continued and **be reviewed on an annual basis** to take into account the requirements of developing countries;*

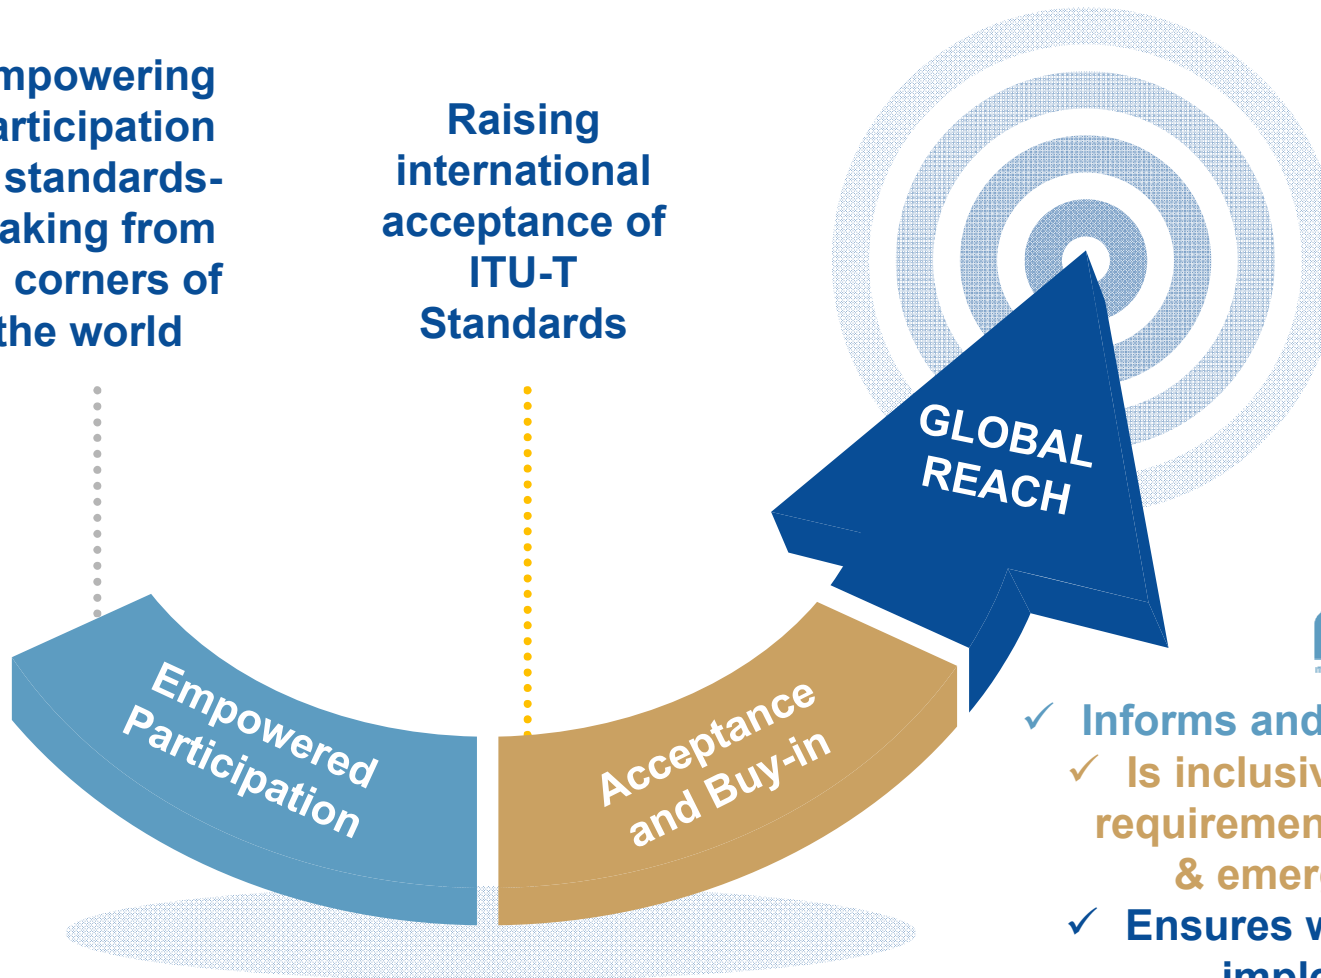

BSG and the ITU-T Value Proposition

Bridging the Gap for Global Reach

Empowering participation in standards-making from all corners of the world

Raising international acceptance of ITU-T Standards

- ✓ Informs and Fuels Innovation
- ✓ Is inclusive of needs and requirements of established & emerging markets
- ✓ Ensures wider standards implementation

BSG@ITU 2013-2016: Implementation

BSG: Measuring the impact

Key Performance indicators

Key Performance Indicators or KPIs

- Number of participants from developing countries in ITU-T Study Groups
- Number of RSFs, workshops and tutorials held in developing countries and distinct topics covered
- Number of participants in RSFs, workshops and tutorials held in developing countries
- Number of BSG hands-on sessions held for Study Groups
- Number of participants attending hands-on SG trainings and rate of satisfaction
- Number of delegates certified in the A.1 e-learning course
- Number of Study Group Chairs and Vice-Chairs from developing countries
- Number of SG Regional Group meetings held

Information and Awareness: RSFs

Forums Around the World for Bridging the Standardization Gap

ITU-T Regional Standardization Forums for BSG

Meetings and Participants by Region (2013-2016)

RSF in ARB

- 4 Meetings
- 175 Participants

RSF in AFR

- 3 Meetings
- 145 Participants

RSF in APT

- 4 Meetings
- 323 Participants

RSF in CIS

- 1 Meeting
- 48 Participants

12

RSFs organized

19

Total number of days

707

Number of participants

Information: Tech Papers & Other Studies

Disseminating knowledge and information: Study Period 2013-2016

2013

Impacts of M2M and Non-M2M Mobile Data Applications on Mobile Networks

How to increase Quality of Service (QoS)/ Quality of Experience (QoE) of IP-based Platform

Migration scenarios from legacy network to NGN in developing countries

Telecommunications and Disaster Mitigation

2014

Applications of wireless sensor networks in Next Generation Networks

Guidelines on National Standardization Secretariats and Consultancy projects (2013-2016)

The “Guidelines on the establishment of a National Standardization Secretariat (NSS) for ITU-T” was developed in 2013 and published in 2014. It takes into account the **different capability levels** for standardization across the developing countries, showing how it is possible to **establish an NSS at a basic level** with **very little new cost or resource requirements**.

TSB conducted a consultancy exercise for Zambia ICT Authority from November 2015 to March 2016 to **undertake an audit** of the current set up for ICT standardization activities and its national standardization secretariat and **make recommendations** on processes that could be enhanced in order to **participate more effectively** in ITU-t activities.

Know-How: On-line learning

E-Learning Course on Working Methods of ITU-T Study Groups

In 2014, TSB developed an **e-learning course** on **ITU-T Recommendation A.1**, Working methods of ITU-T Study Groups

The course comprises six modules:

- *Standardization in ITU-T*
- *Managing the study groups*
- *Coordination*
- *Inputs to the study groups*
- *Outputs of the study groups*
- *Further infrastructure supporting the study group process*

Some **353 persons** have attempted the course and **175 persons** have obtained **the certificate**.

Recommendation ITU-T A.1: Working Methods of ITU-T Study Groups

Know-how: Developing the right skills

Taking into account the disparities in the ability of developing countries, relative to developed ones, to access, implement and influence international ITU-T standards, one of the core areas of the BSG programme is geared towards assisting developing countries in acquiring the right skills and capabilities for international standards-making. This page introduces our e-learning courses and primers, and provides information about our hands-on interactive training sessions and related events.

These are intended to help delegates from developing countries become familiar with how ITU-T Study Groups work and how to navigate the standards development process in order to reach their standardization objectives.

 <p>Strategy</p> <p>Choosing the right strategy in line with key objectives is an essential part of preparing for ITU-T Study Group meetings.</p>	 <p>Contribution</p> <p>Drafting well structured and effective contributions including concrete proposals is a vital skill for maximizing effectiveness in ITU-T Study Groups.</p>	 <p>Communication</p> <p>Communicating and presenting effectively is a key skill for any delegate and the programme shares tips and techniques for presentations through interactive sessions.</p>	 <p>Collaboration</p> <p>Learning how to discuss proposals in a spirit of collaboration to achieve objectives is further covered in the training programme.</p>	 <p>Consensus</p> <p>Gaining support and building international consensus is a vital part of the ITU-T standards-making process and the training also covers these aspects.</p>
