# 5G USE CASES

**eMBB\***, >10Gbps peak data rate,  
100Mbps always  
10000x more traffic  
Enhanced Mobile Broadband

4K/8K/HDR video streaming  
High Speed FOTA  
High Speed Download  
...

Gigabytes in a second

Smart Home/Building

3D video, UHD screens

Work and play in the cloud

Augmented reality

Industry automation

Self Driving Car

Mission critical application  
e.g. e-health

Voice

Future IMT

Smart City

Massive Machine Type  
Communications

Ultra-reliable and Low Latency  
Communications

Cooperative Driving  
Highly Automated Driving

Smart Vehicle & IoT

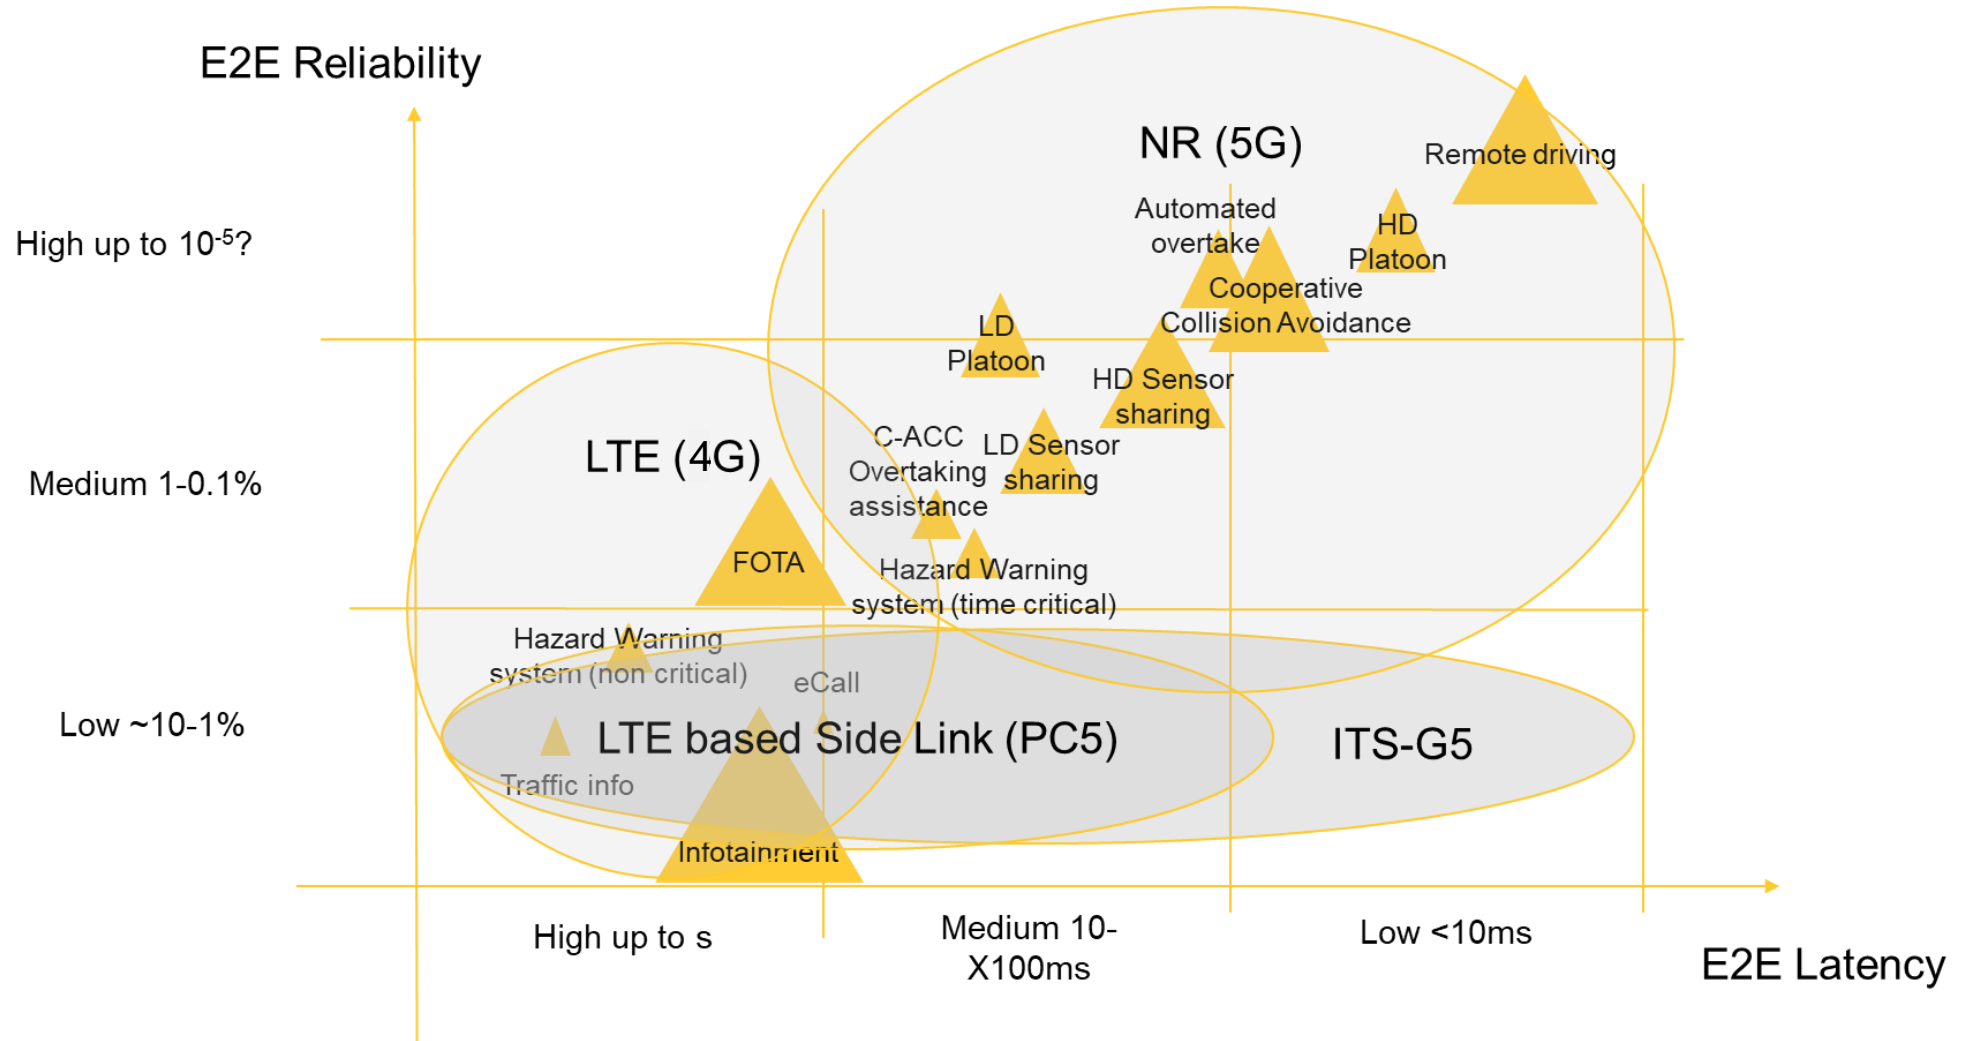

**mMTC\***, >10 years battery life  
M2M Ultra low cost  
10x -100x more devices

**URLLC\***, <1ms radio latency, <10ms E2E latency  
99.999% Reliability

# USE CASES - COMMUNICATIONS

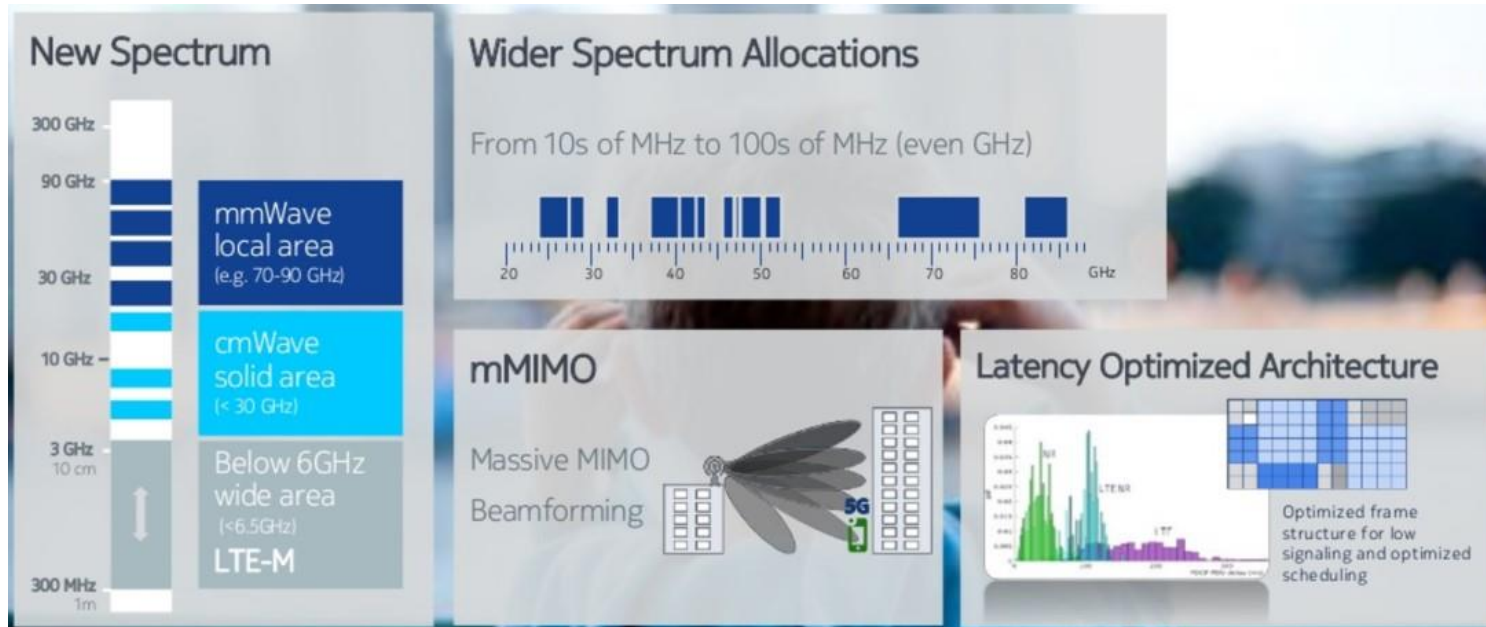

# WHAT MAKES 5G DIFFERENT?

## NEW RADIO

- 3x spectral efficiency; 5x energy efficiency compared to LTE
- Massive MIMO
- < 1ms radio latency

## CORE NETWORK

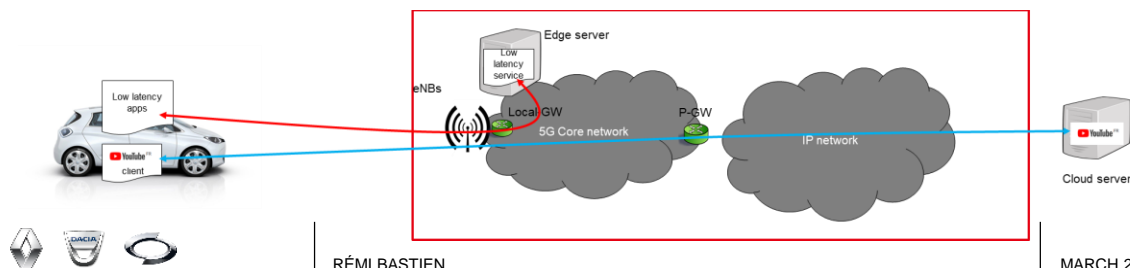

- Network Slicing** enabled by Network Function Virtualization (NFV) and SW Defined Network (SDN) for dynamic mapping of U-plane traffic to dedicated (and distributed) edge clouds
- <10ms E2E latency

## MVNO

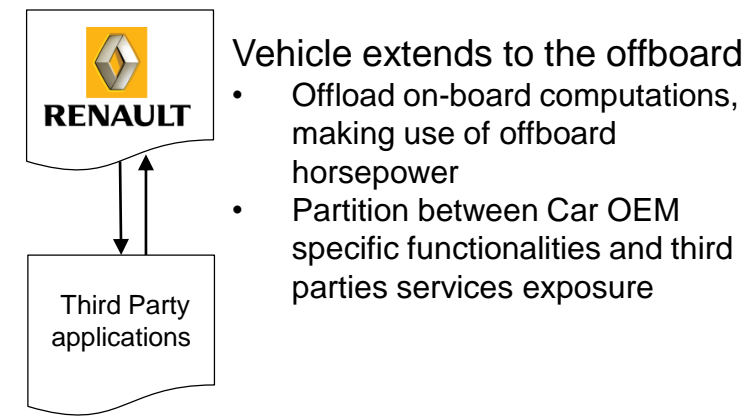

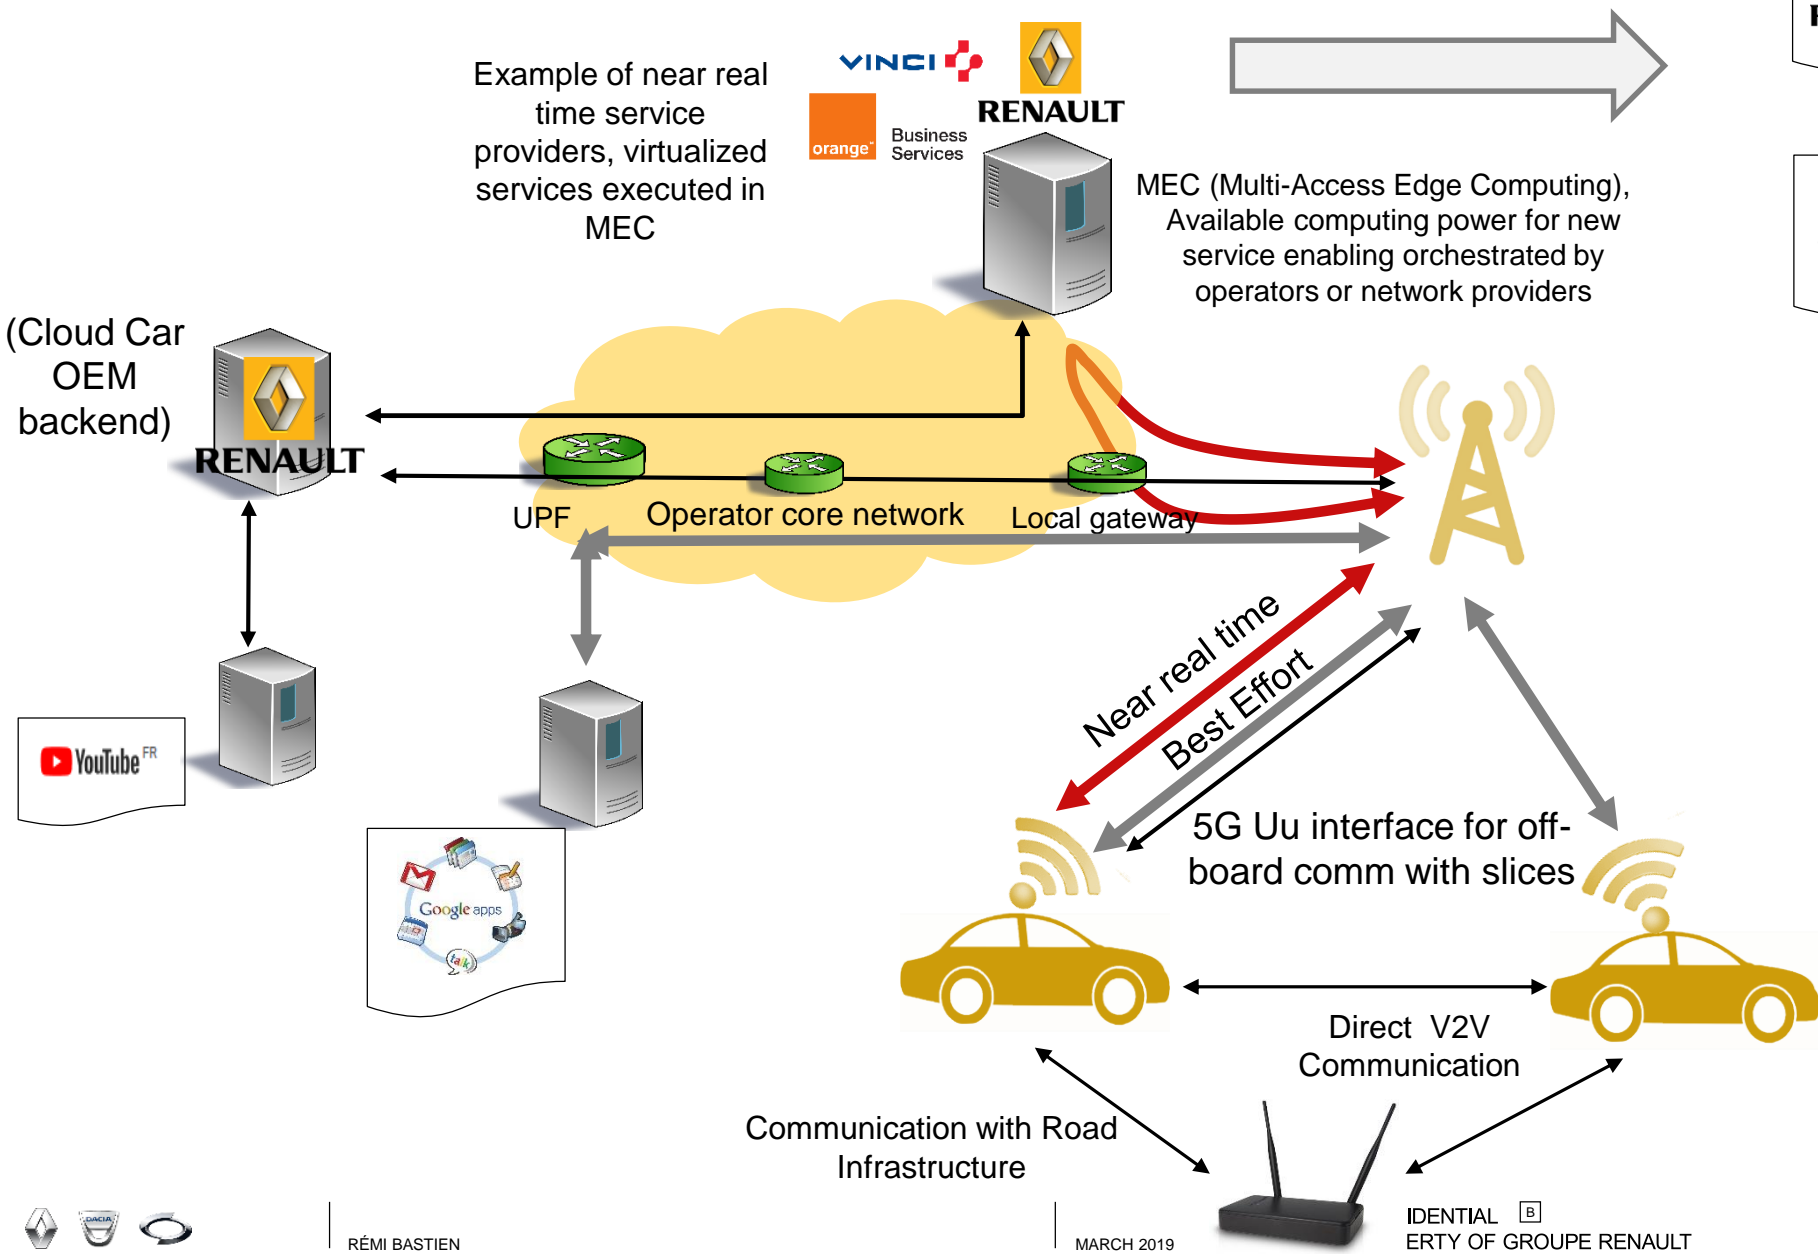

- Business model:** network slices administered by MVNO (Mobile Virtual Network Operator)

- Multi-Access Edge Computing (MEC)** moves the computing power close to where it is exploited reducing latency and bringing real-time performance even for high bandwidth applications

# RENAULT ENGAGEMENTS IN 5G PROJECTS

## Renault's activities

5GCroCo

- Anticipated Cooperative Collision Avoidance, characterize the performance with MEC
- **Thesis:** Optimal use of MEC computing power for integrated connected services

Cifre Conventions

orange Business Services

RENAULT

ERICSSON

- MoU Renault/Orange/E/// (on going) for virtualization of services in MEC infrastructure for multiple service providers.

# 5G advantages over 4G

Diverse range of use cases

- Up to +10ys battery life for IoT devices
- 90% reduction in network energy usage
- 100% coverage
- 99.999% availability
- 10-100x improvements in peak data rate compared to 4G (up to 10Gbps)
- 1ms latency (air latency)
- 1000x bandwidth per unit area
- Up to 100x connected devices per unit area compared to 4G

Not all KPI can be achieved in the same time

Deployments will take some time before reaching ubiquitous availability of E2E 5G

➢ Non Standalone deployments (5G radio over an LTE Core network) deployed first

➢ Standalone (full E2E 5G Radio network + Core network) deployed later

- Consumers:**
- Mobile Broadband
  - Events
  - Entertainment
  - SoHo/Homes
- Industries:**
- Manufacturing
  - Seaports, Mining
  - Agriculture
  - Utilities
  - Smart Cities

Use-Case				Delivered by Network Slice				
Application Category	Examples	Cost Sensitivity	Deployment	Throughput (bps)		Latency (RTT)		Reliability
				UL	DL	E2E Appl.	Network	
Mobile Broadband	Smartphones in dense urban Corporate mobile office	Medium	mass	10-50M	100-300M	50-200ms	15-25ms	Medium - High
Fixed Wireless Access	5G for residential homes Wireless SOHO/VPN	High	targeted	100-200M	1-5G	150-200ms	1-20ms	High
Event experience	Immersive VR360 AR gaming	Medium	targeted	1-5G	1-100M	5-50ms	1-5ms	Medium - High
In-Vehicle Entertainment	Private cars Public transport	Medium	mass	1k-1M	5-100M	150-200ms	1-20ms	Medium-High
Critical automation	Collaborative robots/drones Electrical grid tele-protection	Low	mass	1-10M	1M	5-50ms	1-5ms	High/Very High
Tele-operation	Video-based remote control Video w/haptic remote cntrl	Medium	targeted	1-10M	1M	50-150ms	1-25ms	High/Very High
Highly interactive AR	Co-present Mixed Reality 360° volumetric video AR/MR	Medium	targeted	1-100M	5-100M	50-100ms	1-10ms	Medium
Mass sensor arrays	Agriculture field sensors Smart city sensors & meters	Very High	mass	1k-1M	1k-1M	1-2s	200-500ms	Medium-Low
