COS ITU

Edition 2002 – Version 1.0

Software for the Calculation of Costs, Tariffs and Rates for Telephone Services

This new, powerful software tool will allow network operators, service providers, regulators and policy-makers in developing countries to efficiently calculate costs, taxes related to trade in international traffic (accounting, settlement and termination rates), interconnection rates between local operators and tariffs for national and international telephone services, both fixed and mobile.

COSITU is a bilingual software package (software on CD-ROM + user manual: English/French) produced by the ITU/BDT Financing Strategies Unit. It costs CHF 400. English/Spanish version available soon.

Special offer for 3 months from 1 May to 31 July 2003!

Buy COSITU now, and get a **free** paper copy of *Trends in Economics and Finance – Volume I: Cost, Tariff and Interconnection Rate Calculation Methodology – Application to Case Studies*
