

Session 5 - TDR Interworking Requirements

- Key aspects:
 - ◆ Addressing space: need to be able to “call” into a crisis area as well as to “call” out of it
 - ◆ Broadcasting: the people affected by a crisis may find receive-only broadcast information very useful
 - ◆ Interoperability of emergency services telecomms systems is preferable to interworking
 - ◆ Emergency services organizations should be free to apply their core competencies: telecomms experts should support them by supplying their expertise

Telecommunications for Disaster Relief
