

International Telecommunication Union

# Session 8

## Performance and Security Considerations

Jean-Yves Monfort  
ITU-T SG 12 Chair

# Introduction

- Considering the requirements from the users for TDR expressed during previous sessions, Sessions 8 will give some inputs on the following matters:
  - Quality of Service
  - Users Authentication
  - Security
  - Network management
- All these topics are identified in Draft Recommendation M.3350, planned for consent at next SG 4 meeting, and will be also considered in draft Y.roec and in draft F.706
- The objectives of this session are to draw a picture of the existing and future standards needed for TDR .

## Session 8 Programm

- Introduction
- QoS for TDR traffic- J.Y. Monfort, France
- Authentication of TDR users- I. Brown, U.K.
- Security protection of TDR traffic- H. Ohno, Japan
- TDR Service Management Interface- H. Folts, USA
- Conclusions
