HYDERABAD

The **ITU World Telecommunication/ICT Development Report (WTDR) 2010** focuses on
Monitoring the WSIS Targets

Half way through the timeline for the achievement of the 10 targets that governments agreed upon at the World Summit on the Information Society, the report:

- Reviews the 10 targets, which range from connecting villages, schools and health centres to developing content, and providing people with ICT access
- Provides policy-makers with an assessment of progress made to date
- Proposes concrete indicators to monitor the targets
- Makes recommendations on policies and measures to help achieve the targets by 2015

The report reflects a joint effort among several international organizations, led by ITU, with contributions from UNESCO, WHO and UNDESA, as well as from representatives of civil society.

Do not miss the presentation of the WTDR at the WSIS Forum:

10 May 2010 at 14:00h

Room H, ITU Headquaters, Geneva
