National e-Strategies Development Global Status and Perspectives 2010 Report

The 2010 National e- Strategies Development Global Status and Perspectives Report provides an overview of governments' efforts in elaborating comprehensive, forward-looking and sustainable national e-strategies. This includes ICT strategies and sectoral e-strategies as an integral part of national developments plans and poverty reduction strategies as was called for by the Tunis Action Agenda for the Information Society.

The report is based on information collected through the ITU WSIS stocktaking mechanism and by the different UN Regional Commissions, complemented by extensive online research. The Report provides:

- High level updates on countries' progress related to the development of national ICT and sectoral e-strategies of Member States;
- Broad analysis highlighting some of the main components of national plans, lessons learned, common trends, strategic approaches and national plans evolution;
- Quantitative and qualitative analysis of the integration of e-strategies into poverty reduction strategies.
