Have you used the Internet from any location in the last three months?

No Yes

impact

Our vision

- A new platform that becomes the go-to place for all ICT-related information...
- with much more data, more tools, more appealing, more intuitive, more interactive, more visual, mobile responsive...
- featuring contextual information, analysis and research to make sense of the data...
- used by a large and diverse community of users...
- who are better informed and make better decisions in their effort to end all forms of digital poverty.

The easiest way to access ICT data.

ITU, the UN specialized agency for information and communication technology, has its “eye” on ICTs and is recognized around the globe as the leading provider of timely and comprehensive telecommunication/ICT statistics and trends. The ICT “eye” website is a one stop-shop for ICT information and provides telecommunication/ICT indicators and statistics, regulatory and policy profiles, and national tariff policies.

Measuring digital development Facts and figures 2020

Potential features

Data

More data
5% of ITU stats currently available on ITU website

Third-party data beyond ITU data for more holistic picture

Disaggregated data when available (e.g. age, gender, location, income)

More country grouping averages, incl. custom grouping

Content

'Build-your-own' country dashboard with own KPIs peer groups

Thematic dashboards (e.g. SDGs, youth, gender, prices...)

Interactive infographics, data stories

Country and regional analysis

Tools and functions

Custom data query

Public APIs for use of data by third party organizations

More shareability (e.g. download, share, embed, export, mail)

Advanced analytical tools

More charting tools, including maps

Fully mobile responsive

Thank you!

Next session starts at 13h.
