EIII User Testing Tool

About

The EIII User Testing Tool (UTT) is a bookmarklet designed for web accessibility evaluation. With this tool, you can evaluate some of the accessibility barriers that cannot be measured automatically and share your evaluation results with EIII.

This version will cover 2 tests that cannot easily be implemented for automatic checking. With this tool it is possible to evaluate page titles and the headings structure of a web page. Please note that this version is still a prototype offering a few examples of possible tests. We are still optimizing the accessibility of the bookmarklet so stay tuned for more information.

The UTT is part of the European Internet Inclusion Initiative project. You can find more about the EIII project at the [project website](#).

Download

You don't actually "install" a bookmarklet. You simply add it to your bookmarks. Drag and drop the following image to your bookmark toolbar:

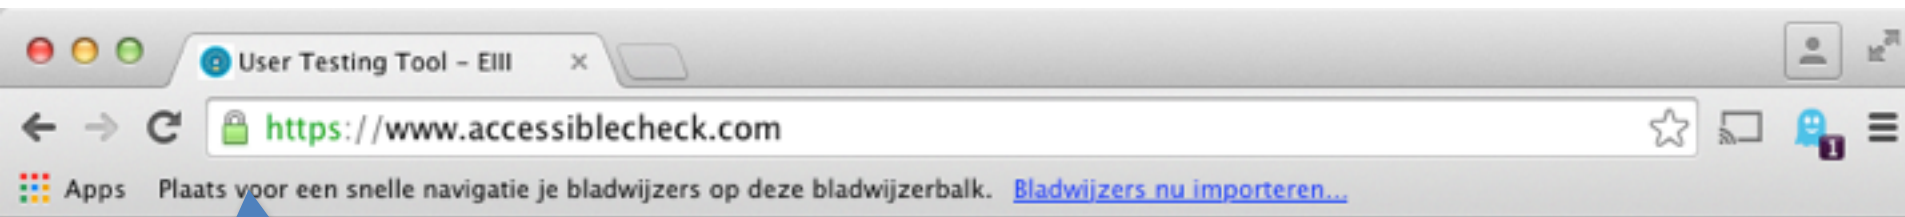

www.accessiblecheck.com

If your bookmark toolbar doesn't show on Chrome or Internet Explorer use the

Download

You don't actually "install" a bookmarklet. You simply add it to your bookmarks. Drag and drop the following image to your bookmark toolbar:

If your bookmark toolbar doesn't show on Chrome or Internet Explorer use the Ctrl+Shift+B keyboard shortcut (Command+Shift+B for Mac users) to display the bar. For Firefox or Internet Explorer, you can also right-click and save it as a bookmark.

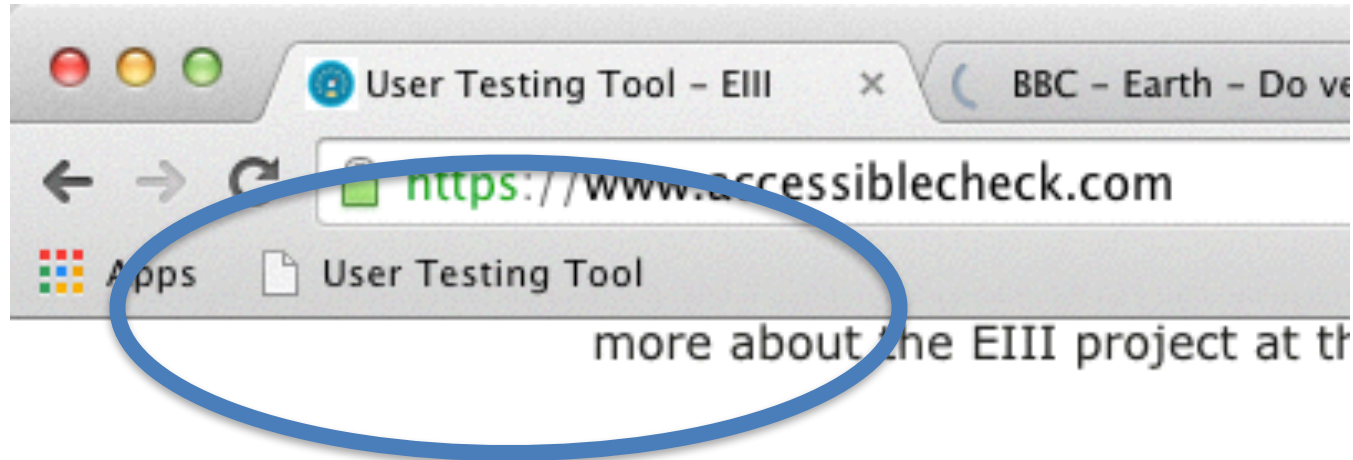

How to start

After you dragged the bookmarklet link to your bookmark toolbar, you are ready to start. Open a new web page and click on the bookmarklet link. The tool appears at

You don't actually "install" a bookmarklet. You just use it. Drag and drop the following image to your bookmarks bar.

User Testing Tool

Page titles 

Is the page title correct?

The web page has the following title:

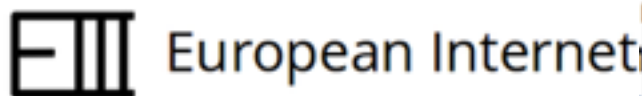

User Testing Tool - EIII

Does the web page title describe the context and purpose of this web page?

Yes **No**

This module checks the title of a web page. Page titles can help disabled users find content and orient themselves on a website. Make sure that each web page has a title that describes the content of the page.

EIII User Testing Tool

About

The EIII User Testing Tool (UTT) is a bookmarklet for user testing. It allows you to evaluate the accessibility of a web page. Some tests cannot be measured automatically and share your results with the EIII team.

This version will cover 2 tests that cannot easily be checked. With this tool it is possible to evaluate the structure of a web page. Please note that this tool is still in development. Here are a few examples of possible tests. We are still open to suggestions. Contact us via our [project website](#) or [Twitter](#). Bookmarklet so stay tuned for more information.

The UTT is part of the European Internet Inclusion Initiative. For more about the EIII project at the [project website](#).

Download

You don't actually "install" a bookmarklet. You just drag and drop the following image to your bookmarks bar.

User Testing Tool

Headings

Structure and description.

- 1 EIII User Testing Tool** ✓
Does the header describe the content of the paragraph that follows?
- 2 About** ✗
Does the header describe the content of the paragraph that follows?
This module checks the headers of a web page. This provides people with disabilities better overview over the page content and makes it easier for them to search and find information. Make sure that headers are clear and descriptive.
