ITU Report : Digital Divide is Growing !!

**Affordable
Optical Cable Solution**

Digital Divide ‘a Matter of Life and Death’

- Need to bridge the digital divide

UN Secretary General (June 2020)

Digital Divide ‘a Matter of Life and Death’ amid COVID-19 Crisis

<https://www.un.org/press/en/2020/sgsm20118.doc.htm>

UN Trade and Commerce (April 2020)

Coronavirus reveals need to bridge digital divide

<https://unctad.org/en/pages/newsdetails.aspx?OriginalVersionID=2322>

- Wireline is critical

US Telecom CEO

5G is Wired Wireless (Dec. 2019)

<https://www.ustelecom.org/5g-is-wired-wireless/>

Global 5G Era → Optical Cable Backhaul is a MUST for WiFi

- High data rate
- Low latency
- Massive connectivity

2G

2.4kbps~
28.8kbps

3G

384kbps(CDMA2000)
~14Mbps(HSPA)~
110Mbps(LTE)

4G

50Mbps~
1Gbps

5G

1Gbps~
50Gbps

Typical Cable Installation Today

conventional optical cables

↳ To save the cost and time →

➔ “DIY” is happening

More Affordability and Speed Needed

Lightweight Robust Optical Cable and ITU-T Standardization

Lightweight Robust Optical Cable

The Key: Stainless Steel Tube

3.6 mm

Laser Welding

Stainless
Steel Tube

≤ 48
Fiber Cores

Rodent Proof

Proposed Cable, survived

Conventional Cable, broken

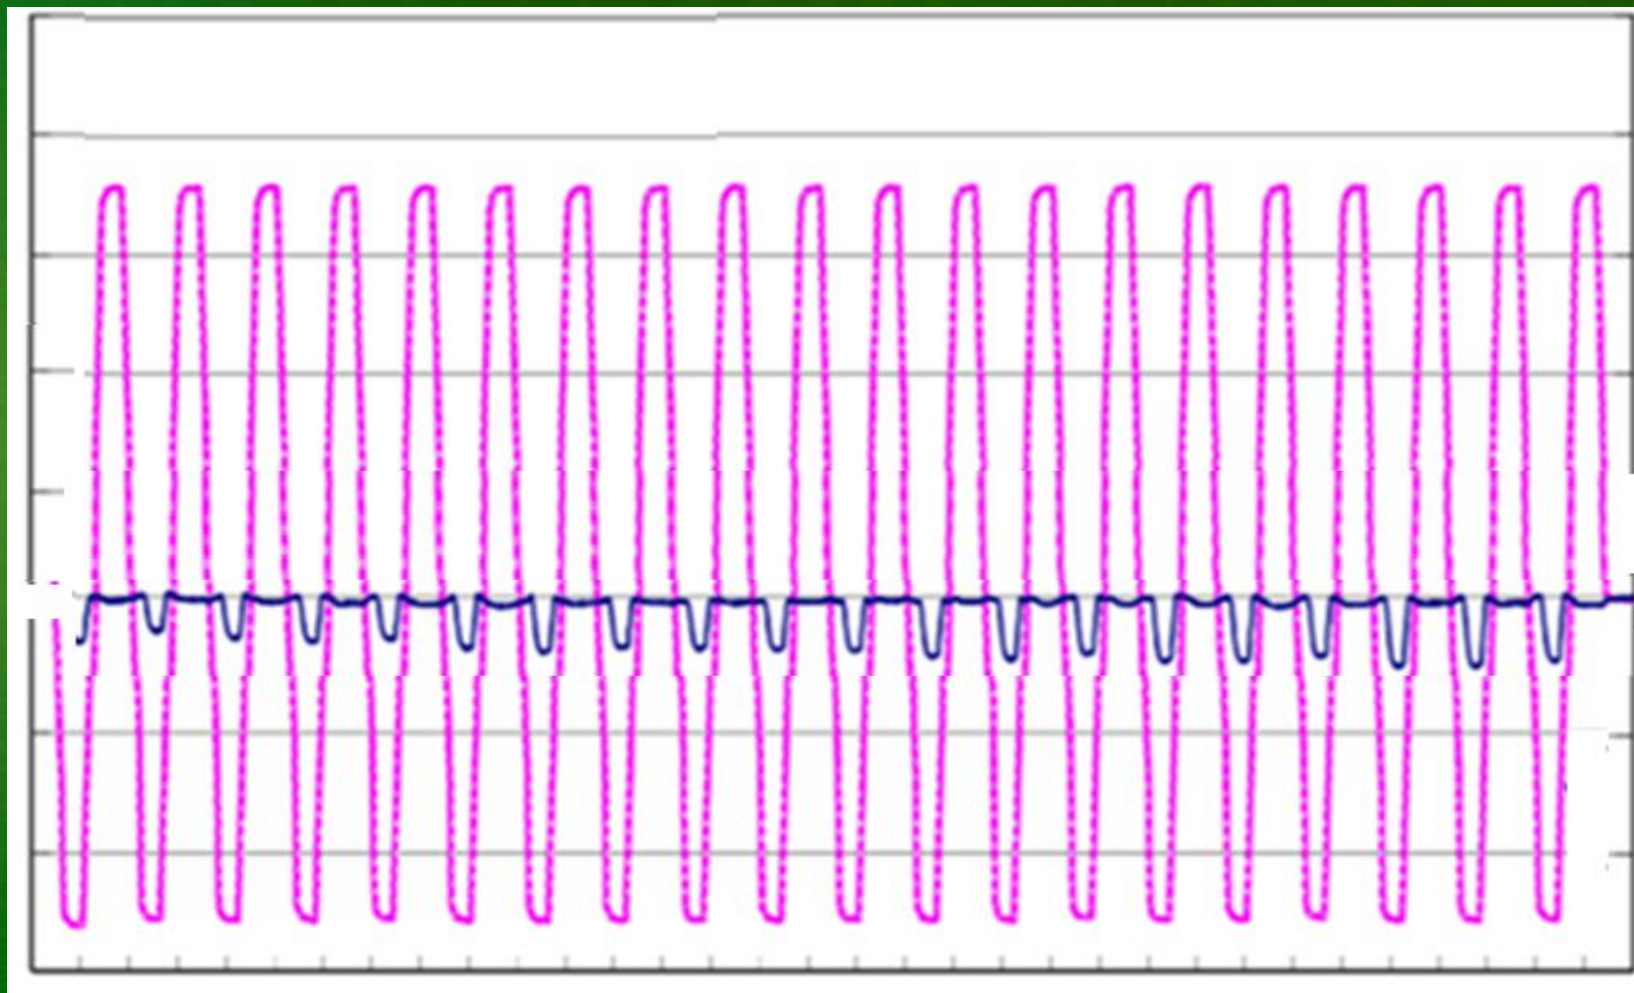

Cable Crush Resistance

Up to 2000 kg/100 mm

Heat Cycle

After 20 cycles in 300 Hours

+70 °C

- Optical loss change
<0.06 dB/km

- Residual optical loss
-0.001 dB/km

-50 °C

200 m cable with 24 fibre cores (spliced at each end)

1180°C, 15 min
Optical Loss <0.05 dB

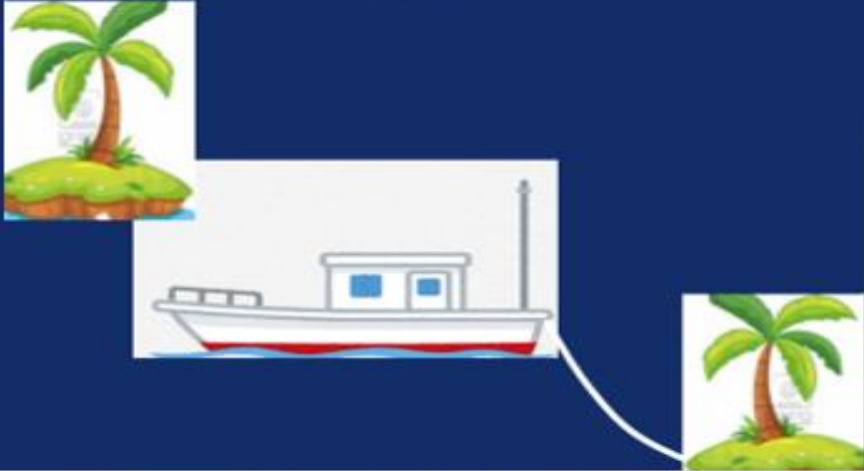

All-Round Installation (1)

All-Round Installation (2)

Coastal Waters

Air Suspended

(11/2018)

**L.110 Cable Installation
in DIY (Do-It-Yourself)**

... AND PROTECTION
... AND OTHER ELEMENTS OF OUTSIDE
PLANT

Optical fibre cables – Guidance and installation technique.

**Criteria for optical fibre cable installation with
minimal existing infrastructure.**

L.163

Broadband/Network | ICT4SDG | Infrastructure | ITU-T Standards | SDG10 | SDG9 | Standards

January 10, 2019

New ITU standards bring broadband to places as remote as Mount Everest

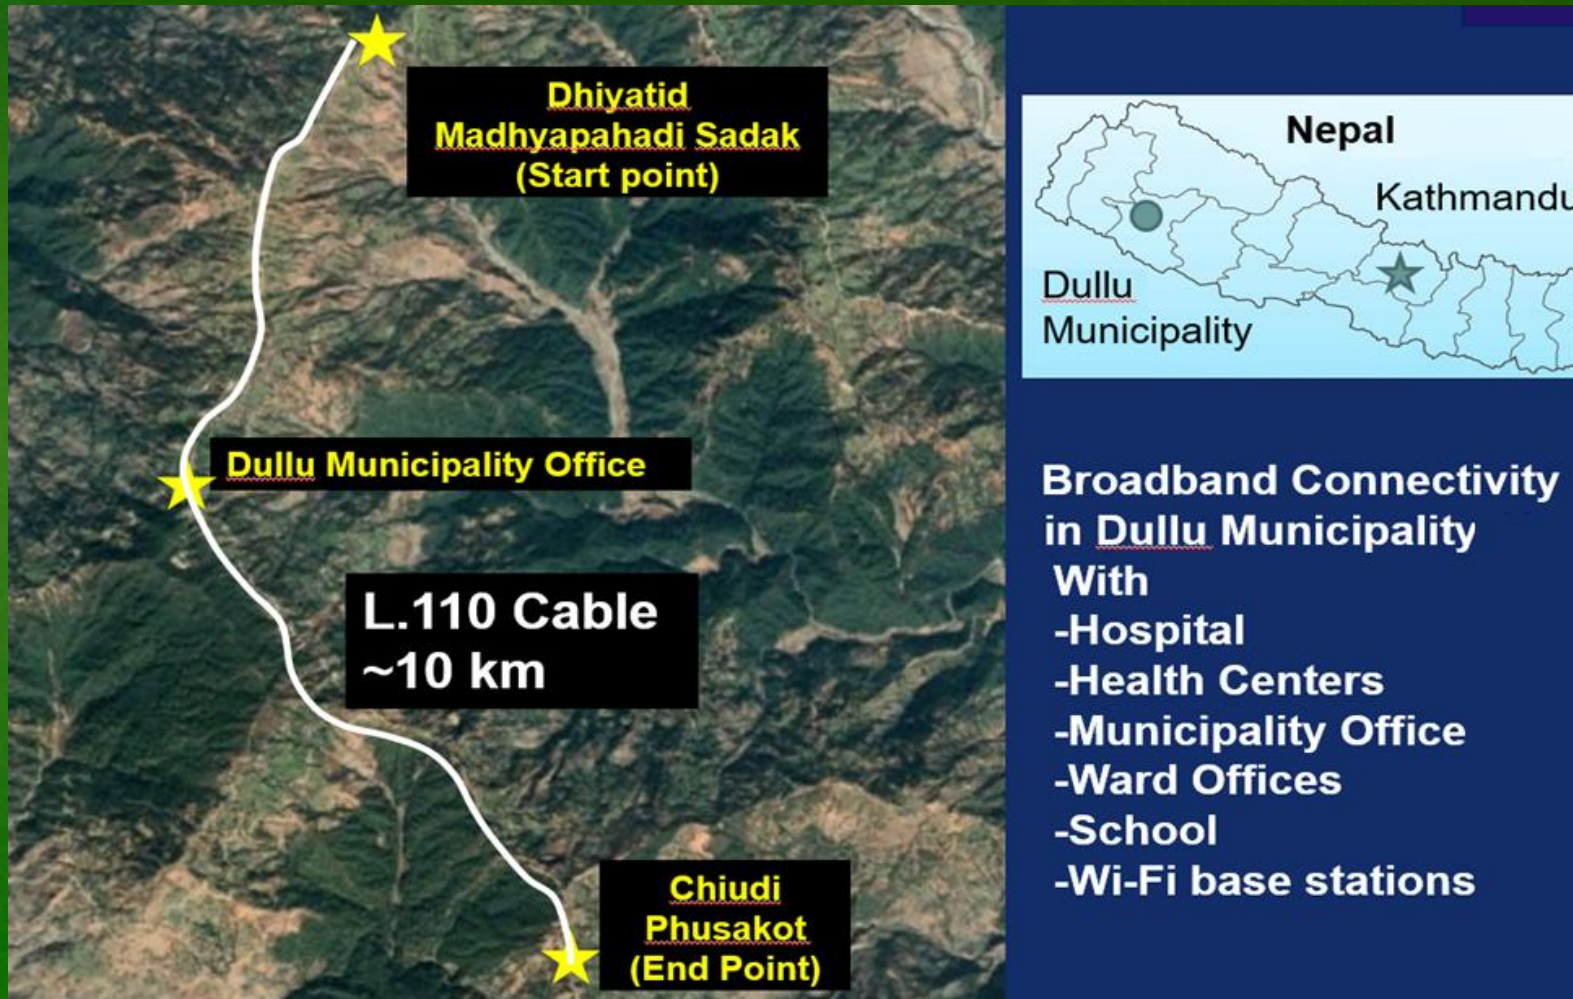

New ITU standards bring broadband to places as remote as Mount Everest

Deployment of the solution

Dullu Municipality, 2019

West Nepal Mountain Village

**APT Project
Category II**

**~10 km
L.110 Cable**

Mongolia, 2019

Most cold area / Desert

APT Project
Category II
L.110 Cable, ~22 km

50% suspended (existing poles)
50% buried
coldest at -40 to -50°C

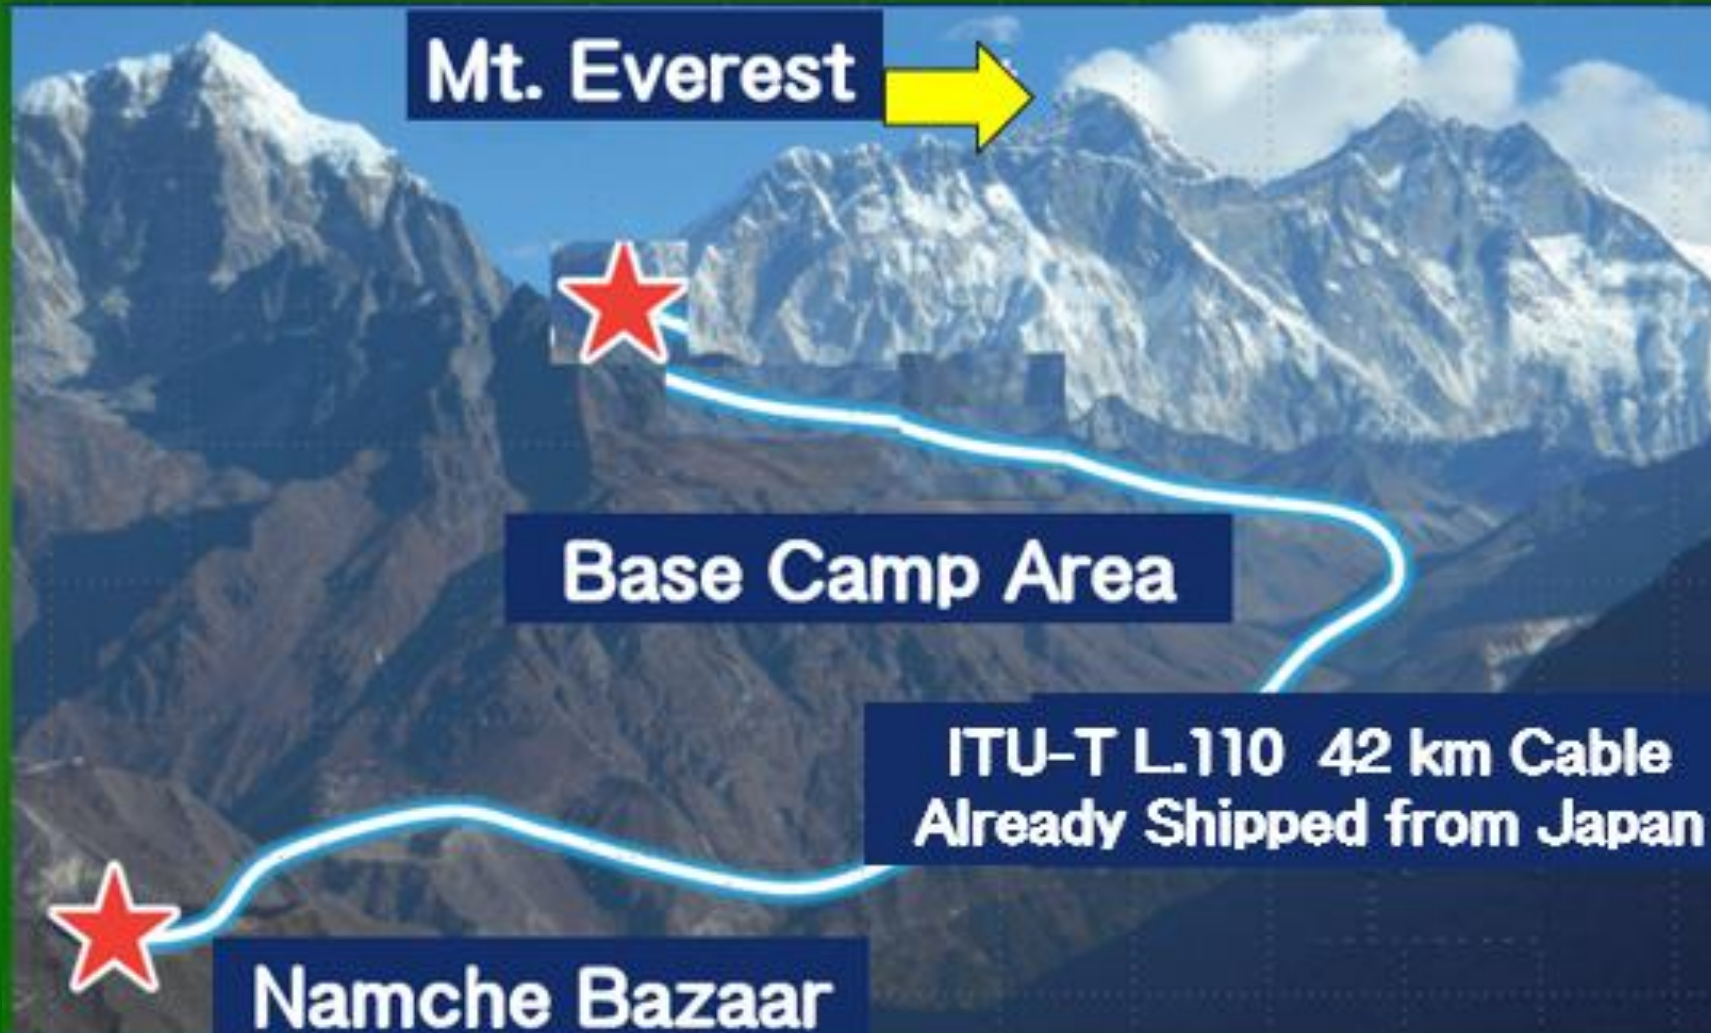

- Arkhangai /province/ center
- Bayankhongor /province/ center
- Tereji area

L.110 Cable, 4 km

L.110 Cable, 5.8 km

L.110 Cable, 12 km

Everest Project, ongoing 2020

As a TEIN Project

Trans-Eurasia
Information Network

Cost Reduction Example

Meeting ITU-T L.1700, L.110 and L.163

Civil works	58	k US\$/km
Cable	~ 1	k US\$/km
Manhole	4.8	kUS\$/km
Pipe	8.0	kUS\$/km

72 k US\$/km

data by Korea Telecom, at UNESCAP, Sept. 2013, Baku

88% Cost Reduction

- Civil Works 3.3 k US\$/km
100 US\$/head/day
300 m/day (10 Workers)
- Cable < 4-5 kUS\$/km
- No Manhole, No Duct

8.3 k US\$/km

Bridge the Digital Divide (1)

Stop the Pandemics

- ☆ Broadband solution BIRD is now available meeting the ITU standards.
- ☆ The solution has been deployed in Japan for 20,000 km, in 25 years.
- ☆ Rural areas in Nepal and Mongolia deployed the solution in 2019.
Two more for 2020-2021 in Nepal.

Bridge the Digital Divide (2)

Stop the Pandemics

- ☆ How to prioritize, quickly globally implement this solution
 - Media, Governments, Universal Service Funds
 - Development Banks, Grants, Foundations,
 - Investors, Suppliers, Local Communities, etc..
- ☆ Let's cooperate, not compete against the tough alien

This pandemic is changing the perception of the Internet - and the digital divide
