

Title of Workshop : Assistive Technology and Software solutions to Empower Children with Physical, Motor and Intellectual Disability.

Organiser: Ada Lovelace Software Private Limited. INDIA and Key2enable, UAE

Emerging Trends :

- Artificial Intelligence and Assistive Technology to empower Children with Disability.
- Engagement of young learners with disability through Neuro Psychological-Pedagogical interventions.

Concrete Actionable Items Identified:

- No one should be left behind – Digital Inclusion is the Key.
- Covid ability – Children with Disability can use the online educational Platform at home when Schools are closed during Lockdown and similar situation.

Challenges:

- The pandemic has upended entire education system, disabled children is no exception.
- Providing access to quality learning experiences in low-connectivity settings in rural areas.
- Ensure physical Safety and mental health of young learners during Pandemic.
