

### **Colin Langtry**

He was appointed Counsellor for Radiocommunication Study Group 8 in the International Telecommunication Union (ITU) in November 2000. In this capacity, he provides secretariat and technical support for activities within the ITU addressing mobile, radiodetermination, amateur and related satellite services, including Working Party 8F "International Mobile Telecommunications-2000 and systems beyond IMT-2000".

His prior experience includes responsibility for the Text Editing and Publications Division of the ITU Radiocommunication Bureau and, before joining the ITU, planning for the introduction of microwave radiocommunication services in the Australian government Spectrum Management Agency.

He has a Bachelor degree in Electrical Engineering, with specialization in radiocommunications, from the University of New South Wales, Australia.
