Recommendation D.250

GENERAL CHARGING AND ACCOUNTING PRINCIPLES FOR NON-VOICE SERVICES PROVIDED BY INTERWORKING BETWEEN THE ISDN AND EXISTING PUBLIC DATA NETWORKS

(Melbourne, 1988)

The CCITT,

considering

(a) that, during the transition period, it is essential that Administrations provide interworking between existing public data networks and the ISDN in order to continue providing users with non-voice services;

(b) that, it is desirable to adopt general charging and accounting principles for these services when their provision needs interworking between ISDN and existing public data networks;

(c) that, in principle, the interworking between these networks should take place in the ISDN country or in the country of origin (if ISDN is available in both terminal countries);

(d) the relevant D-series Recommendations,

recommends

1 General interworking principles

See Recommendation D.15 concerning the general charging and accounting principles for non-voice services provided by interworking between public data networks.

2 Specific interworking principles

Specific applications for interworking not addressed by the general principles of Recommendation D.15 are for further study.
